CLINMASTERS

MESSAGE FROM CHIEF MENTOR

DR ANMOL S. KALHA
MDS, Col (Retd.) AD Corps

Welcome to ClinMasters!

It gives me immense pleasure to introduce our center for clinical excellence.

We are a team of experienced clinicians who stand committed to enhance your clinical skills.

All our training programs are clinically driven, based on interactive & hands on teaching learning experience – Tell Show and Do Methodology.

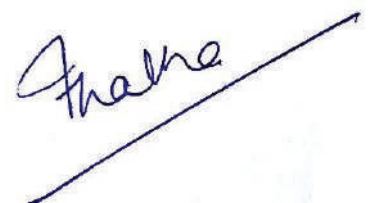

We offer long term & short term courses for young and experienced professionals.

We understand that there is a huge gap between the skill set you need to have as a clinician and what you learn as a part of your college curriculum.

We bridge the gap between what you have learnt/what you know and what you need to know to achieve clinical success in your practice.

We are here to upskill you in contemporary practices and make you ready for a successful career.

We look forward to welcome you.

COURSE LEADS

Dr. Ashish Sharma

Oral Surgeon & Implantologist

20 years + Experience

Trained 5000+ Dentists

Guided 2500 + Implant Cases

Dr. Himanshu

Oral Surgeon & Implantologist

15 years + Experience

Trained 4000+ Dentists

Guided 1500 + Implant Cases

ClinMasters is a part of ITS Education Group which has 25 years + of strong standing in the field of dental education.

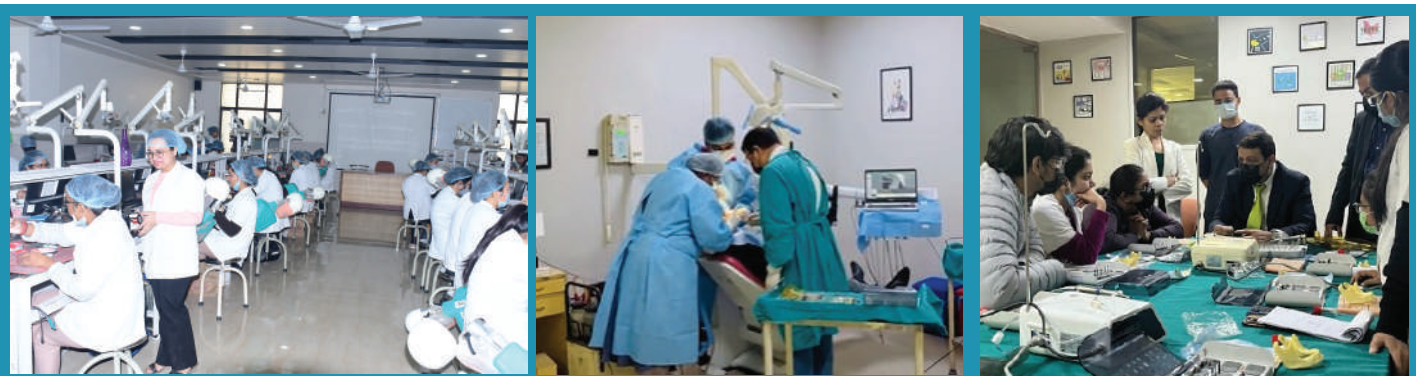

Facilities at ClinMasters

We have a state of the art center with following facilities for course participants:

- Simulation Labs
- Dedicated Clinical Area for supervised patient work
- Virtual & Hybrid Live Demonstration Areas
- Smart Meeting Rooms for Interactive Teaching Learning Sessions
- Access to Library Resources
- Dedicated Coffee Shop, Pantry and Hospitality Services
- Boarding, Lodging & Travel Convenience services (as required)

Highlights of Our Courses

- 100% Clinically driven courses
- Maximum Patient Work
- Nationally & Internationally Acclaimed Clinicians
- Limited Seats for Effective Learning
- Live Demonstrations
- Latest Instruments, Materials & Technologies

ADVANCED IMPLANTOLOGY – COURSE 1

About the Course

The course enables participants to learn how to place immediate implants and practice advanced implant procedures like sinus lift and bone grafting.

Course Learning Outcomes

The participants will be able to practice the following procedures:

- Immediate Implants
- Sinus Lift
- Bone Grafting

ONE YEAR GUIDANCE BY COURSE MENTORS IF YOU NEED ANY SUPPORT WHILE PLACING IMPLANTS IN YOUR PRACTICE!

Pre-Requisites

The participants must have placed implants with delayed protocol.

Day 1

Time	Activity	Topic
08:45 - 09:45	Theory/Clinical & Case Based Discussions	Evaluation of Cases of Advanced Implantology: Clinical & Radiographic Assessment, Evaluation of Medically Compromised Patients, Developing Treatment Plans.
09:45 - 10:45	Theory/Clinical & Case Based Discussions	IMMEDIATE IMPLANTS - Criteria for implant placement, Immediate load in extraction sockets, CBCT planning for success, Choosing the Correct Implant Size, Abutment choices for success, Importance of prosthetic planning, Temporary fabrication and how to select the proper prosthetic components & materials for the temporary and final restoration.
10:45 - 11:45	Case Based Discussions	Each participant's individual Implant case is discussed with Case Sheet, Study Cast, IOPA, CBCT and Implant Sizes are pre-determined
12:00 - 13:30	Demonstration on Patient by Course Faculty	1 case of Immediate Implant
14:00 - 16:00	Case Allotment to Participants (Patient Work under Clinical Supervision)	Immediate Implant - 1 case is allotted

Day 2

Time	Activity	Topic
08:45 - 09:45	Theory/Clinical & Case Based Discussions	SINUS AUGMENTATION - to increase residual bone height and maxillary sinus floor elevation in non-dentate area of maxillary posterior region: Diagnosis and treatment planning for sinus lift cases, minimally invasive sinus elevation, using graft materials for sinus elevation, direct & indirect sinus lift: considerations for each technique and step by step explanation, how to prevent and treat complications.
09:45 - 10:45	Theory/Clinical & Case Based Discussions	BONE GRAFTING - regenerative properties of different bone grafts, Guided Bone Regeneration (GBR), bone grafting techniques, flap design and flap management for bone grafting procedures, suture material and techniques for bone grafting procedures.
11:00 - 13:00	Hands On Exercise on Animal Jaws	Bone grafting - auto graft Bone grafting - allograft Sinus Lift
13:30 - 16:00	Completion of Allotment	If any participant is left for Immediate Implant - 1 case, the case is allotted and patient work is done under clinical supervision.

LIST OF COURSES

I. COURSE IN COMPREHENSIVE DENTISTRY

For dentists who want to start independent practice

II. COURSE IN ORAL IMPLANTOLOGY

*IMPLANT PLACEMENTS *SECOND STAGE SURGERY * IMPLANT PROSTHESIS

III. COURSE IN ADVANCED IMPLANTOLOGY

* BONE GRAFT *SINUS LIFT * RIDGE AUGMENTATION *ALL ON 4 IMPLANTS

IV. COURSE IN CLINICAL ENDODONTICS

*ROTARY RCTs * SINGLE SITTING RCTs *CROWN PREPARATIONS *POST & CORE

V. COURSE IN ADVANCED ENDODONTICS

* PROCEDURAL ERRORS MANAGEMENT *RE-RCTs * ENDODONTICS UNDER
MAGNIFICATION *ENDODONTIC SURGERIES

VI. COURSE IN SMILE DESIGN & AESTHETIC DENTISTRY

*3D SMILE DESIGN *PREP GUIDES *PUTTY INDEX *COMPOSITE VENEERS
*CERAMIC LAMINATES/VENEERS *BLEACHING *SOFT TISSUE LASER

VII. COURSE IN ORAL SURGERY

*LA TECHNIQUES *USE OF FORCEPS & ELEVATORS *NON SURGICAL & SURGICAL
EXTRACTIONS *INCISIONS, FLAPS & SUTURES *

THERE IS ALSO A SEPARATE COURSE ON IMPACTIONS

VIII. COURSE IN FACIAL AESTHETICS

BASIC COURSE: *CHEMICAL PEELS *PRP *BOTOX *LASERS * DERMAL FILLERS
*THREADS

ADVANCED COURSE: *ADVANCED PEELS *PRF *MESOTHERAPY
*ENERGY BASED DEVICES *ADVANCED BOTOX * ADVANCED FILLERS *
ADVANCED THREADS

IX. COURSE IN CLINICAL PEDODONTICS

*PULPOTOMY *PULPECTOMY *STAINLESS STEEL CROWNS *BEHAVIOUR
MANAGEMENT

X. COURSE IN CLINICAL PERIODONTICS

*GINGIVECTOMY *GINGIVOPLASTY *FLAP SURGERY *FLAPS WITH BONE GRAFTS
*FLAPS WITH GTR & MEMBRANES

XI. COURSE IN CLINICAL PROSTHODONTICS

*REMOVABLE DENTURES *CROWNS & BRIDGES

XII. LASER DENTISTRY

*SOFT TISSUE LASERS APPLICATION IN DENTISTRY

XIII. COURSE IN TRAUMA MANAGEMENT

*MANAGEMENT OF MAXILLARY & MANDIBULAR FRACTURES

COURSES CAN ALSO BE DESIGNED AS PER YOUR SPECIFIC REQUIREMENTS
